SHRI MADHWA VADIRAJA INSTITUTE OF TECHNOLOGY & MANAGEMENT

(A Unit of Shri Sode Vadiraja Mutt Education Trust[®], Udupi)

Accredited by NBA | Accredited by NAAC with 'A' grade | Affiliated to VTU, Belagavi Approved by AICTE, New Delhi & Recognized by Govt. of Karnataka

Vishwothama Nagar, Bantakal - 574115, Udupi District, Karnataka.

Certificate

This is to Certify that Shri Madhwa vadiraja Institute of Technology and Management has spent Rs. 10,03,000 (Ten lakh three thousand only) in the last five years, i.e., from 2018-19 to 2022-2023 towards the head "Installation of Sewage Treatment Plant" as reflected in the Statement of Accounts of the said period. This information is collated from the respective Statement of Accounts of the years and they are highlighted in the Statement of Accounts.

Dear Sir

Sub: Work order for commissioning 125 KLD capacity Sewage Treatment & Recycling Plant

Ref: Your quotation dated 27 March 2017

With reference to the above subject and further discussion over telephone, we are placing the work order for commissioning 125 KLD capacities Sewage Treatment & Recycling Plant designed based on advanced Sequential Batch Reactor(SBR) technology to our institute with the following terms and conditions.

Price details:

Name of item	Plant Type	Qty	Design Flow	Negotiated Price
125 KLD capacities Sewage Treatment & Recycling Plant	Sewage Treatment Plant	1	125 KLD	8,50,000.00

Other Conditions:

- Taxes will be charged extra
- 20% mobilization advance along with the order
- 60% against pre-installation of equipments at site
- 10% on commissioning of plant
- 10% against final water analysis report.

Yours Sincerely

Thirumaleshwara Bhat

E solutions for the future

27/November /2017

Shri madhava vadiraja institute of technology & Management Vishwothama Nagar, Bantkal-UDUPI - 574115

Sub.: Techno-commercial proposal for 125 KLD capacities Sewage Treatment & Recycling Plant designed based on Advanced Sequential Batch Reactor (SBR) Technology

Dear Sir,

At the outset, let me thank you very much for giving us an opportunity to submit our proposal for the above requirement. We are pleased to forward our techno-commercial proposal for your above subject requirement and has following salient features to ideally suit for your applications

- I. 24/7 fully automatic operation using a PLC. <u>Hence no man-power required for regular operation of plant.</u>
- II. Very little sludge generation. No aerobic digester required. Hence avoiding sludge handling and disposal problem, is suitable for use as manure without aerobic digestion. Hence no aerobic digester required. The sludge wastage quantities are minimal.
- III. Completely odor free operation guaranteed. Hence no mechanical ventilation required.
- IV. Sparklingly clear treated water quality which can be reused for gardening and toilet flushing. No extra Activated Carbon Filter required to meet the treated water quality specified in your specifications.
- V. Low capital & operation costs. Significant savings in space.
- VI. <u>24/7 Trouble free operation</u>
- VII. Innovative & customized technology (German Diffusers, Decanter and Entire Systems Controlled by PLC)

We look forward to receiving your valuable order.

Thanking you.

Yours truly, For E SYSTEMS

1.0 BASIS OF DESIGN

Plant Type: Sewage Treatment Plant

Design Flow: 125 KLD

SEWAGE CHARACTERISTICS

	Untreated	Treated
PH	6.5-7.0	6.5-8.5
BOD5 (mg/l)	350-450	<10
COD (mg/l)	500-600	<50
TSS (mg/l)	300-400	<30mg
Color/odor	- 120	Unobjectionable
Turbidity	- 348	<2
E-coli	//	None
Res. Cl2, mg/l	-	<1

Disposal of treated effluent	Toilet flushing/gardening	
Disposal of sludge	Manure	

Site constraints:

Invert level of incoming raw sewage pipe	If invert level is< -1.0 separate collection	
w.r.t FGL at STP location.	tank is required	

SEWAGE TREATMENT PLANT FLOWSHEET

2.0 THE SQ-EAS TREATMENT PROCESS

The STP Plant has been designed based on SQ-EAS (Sequential Extended Aeration System. SQ-EAS is an advanced Sequential Batch Reactor (S.B.R) technology for removing dissolved and suspended organic materials including biological nutrient removal.

SQ-EAS process is a fully automatic, simple to operate, time based biological treatment system that responds to flow and load variations which is easily expanded and produces a high quality treated water. The processes of biological oxidation, nitrification, denitrification, phosphorus removal and liquids/solids separation are achieved continuously in a single tank. The SQ-EAS process, a variant of the activated sludge process, operates on the continuous inflow and batch outflow principle. The processes in SBR all the unit operations such as aeration, settling and decantation occur sequentially, on a cyclic basis and are controlled by a sensor with timer(Fully Automated).

The SBR treated water is disinfected using Sodium Hypochlorite and filtered through a Pressure Sand Filter. The final treated water will be stored for recycling for toilet flushing purpose. The excess sludge is dewatered using sludge drying beds.

SBR PROCESS ADVANTAGES

- Smaller basin size and less equipment, reducing construction and O&M costs.
- Eliminates primary and secondary clarifiers and return sludge pumps.
- Large basin volume allows storage of mixed liquor and prevents it from being washed out during hydraulic surges.
- The state-of-the-art control system provides a completely automated means of running the process.
- Single integrated bioreactor concept reduces auxiliary equipment and built-up land requirement.
- The high level of automation results in reduced supervision requirements, contributing to lower operating and maintenance costs.
- High treatment efficiency includes biological reduction of nitrogen and phosphorus.
- Low microbiological loading results in longer sludge age, significantly less excess sludge production, and due to its complete stabilization, sludge can be directly disposed into environment without further treatment.
- Aerobic conditions throughout the bioreactor and extended sludge age eliminates the potential for odor.
- Extended sludge age improves its structure and mechanical dewatering characteristics.
- Frequent alteration of factors allows enrichment of a variety of microbial strains.
- Exploitation of metabolic capabilities of various strains is achieved.
- Bacteria maintain high metabolic rate even in low substrate concentration

- > Design Engineering
- > Supply of all mechanical items listed
- > Installation and supervision of electro-mechanical works
- > Testing & Commissioning of the plant

5.0	PRICE & COMMERCIAL TERMS	

The price for design, installation & supervision, & commissioning of 125 KLD STP as per scope of our technical Finalized Price is Rs. 8, 50,000/-(Eight Lakh Fifty Thousand Only)

Taxes: will be charged extra as applicable

Payment Terms

- > 20% mobilization advance along with the order.
- > 60% against pre-installation of equipments at site.
- > 10% on commissioning of plant.
- > 10% against final water analysis report.

Completion time

The plant will be completed within 6-8 weeks from the date of handing over clear site With completed civil tanks.

Force Majeure

No penalty / liability shall be attached to us for non performance or delayed deliveries as a result of Force Majeure.

Water & Power

Free power/water will be provided by you for installation & commissioning of the plant.

General

Any condition/terms, not stipulated in this offer will be a matter of mutual discussion and agreement.

Warranty for equipment

Bought out components & Performance Manufacturer warranty 1 years only Maintenance Cost: consumable cost for (Oil & grease) Rs: 600 / Year (six Hundred Only)

Dear Office Supdt

The maintenance work of STP machinery has been carried out recently. Please proceed with payment.
