Brief Report on Anveshana Project Exhibition

Requesting Permission from Schools for Anveshana Project:

As part of the Anveshana project, our students are tasked with training school children and participating in the project exhibition competition. To facilitate this collaboration and ensure a successful outcome, we have initiated the process of seeking permission from various Near by schools. This involves sending formal requests to school administrations, outlining the objectives and benefits of our activity.

Follow-Up and Coordination:

Following the submission of our requests, we maintain open lines of communication with the school administrations to address any questions or concerns they may have. We are proactive in providing additional information or clarifications as needed and remain flexible in accommodating any specific preferences or requirements expressed by the schools. Government composit Highschool Volakaadu

Obtaining permission from various schools is a crucial step in ensuring the success of the Anveshana project. Through effective communication and collaboration, we aim to forge meaningful partnerships that will enrich the educational experiences of both the participating SMVITM students and the school students.

Students exhibit science models at Anveshana

DHARWAD, DHNS

Anveshana-2023, a science and engineering fair, was held at the SDM Engineering College in Dharwad, where students exhibited their models, won prizes, and also got selected for the State level event.

Agasya International Foundation, Synopsys, and the Department of School Education & Literacy organised the North Karnataka region level Anveshana-2023 event. This year, around 200 models were prepared by various engineering colleges and high schools from various parts of the State. In that, 35 models from 16 engineering colleges, and 24 high schools were selected for the Dharwad event.

Speaking on the occasion, Agasya International Foundation regional head Babita said, engineering colleges were tied up with high schools, and they prepared models on various science and engineering

Students with awards at Anveshana-2023, a science and engineering fair, organised at SDM Engineering College in Dharwad. (DHNS)

subjects, and they exhibited 35 models. They have received 10 medals in the exhibition which will be sent to the State level exhibition in Bengaluru.

SDM Engineering College Principal K Gopinath appreciated the works of the Agasya Foundation, which has been creating awareness and curiosity about science & technology among government school students. Innovation is a con-

tinuous process, as a result, nanotechnology has developed.

Such innovation and new technology are being explained to the students here which will motivate them to take up new inventions, he noted.

On the occasion, Bhaskar Archa, Mahesh K, Hoga Eswari, Shrawan Nayak, Pandalik, Shivamand Chalawadi, and others were present.

In the event, students of Mangalore Institute of Technology, Moodbidri, bagged the top three prizes carrying Rs 15,000, Rs 12,000, and Rs 10,000 cash prizes, respectively. The students of Sri Madhwa Vadiraja Institute of Technology & Management, Kantanal, bagged the fourth and fifth prizes with cash prizes of Rs 7,500 and Rs 5,000, respectively.

Online Anveshana - Science & Engineering Fair

Anveshana Program is structured around the concept of mentoring, "catch them young" and "facilitate the inquisitive minds".

"Mentoring is a process for the informal transmission of knowledge, social capital, and the psychosocial support perceived by the recipient as relevant to work, career, or professional development; mentoring entails informal communication, usually face-to-face and during a sustained period of time, between a person who is perceived to have greater relevant knowledge, wisdom, or experience (the mentor) and a person who is perceived to have less (the protégé)" -
 (source: <http://en.wikipedia.org/wiki/Mentorship>).

The program looks at involving school students to provide an opportunity to work with engineering students to find solutions for the encountered social problems.

Engineering colleges will participate as teams with 2 members. The teams will select 2 students from nearby underprivileged schools (Govt. and Govt. aided schools) to mentor them to design and build models or projects around an identified social problem. In the process school children would directly get the opportunity to work together with more qualified under-graduates, and a chance to 'learn' the basic principles (along with hands-on skills on diverse products and interesting processes). The interaction with Juries and dignitaries would be a life-time experience for them to cherish. The school students thus will be exposed to entire planning, designing and building process of the models and in turn will get educated in the scientific and engineering concepts behind the models in Anveshana.
www.anveshana.org

Over 200 ideas are expected to be generated from 150 engineering colleges, out of which 30 to 40 projects will be displayed and the best 10 will be honoured with cash award. The fair will be spanned over 2 days and expected to be visited by over 3000 Government school children and college students.

Objectives

- To develop innovation and creativity among students from engineering colleges and nearby disadvantaged schools.
- To facilitate process of mentoring between engineering students and school students while they plan, design and make the models together.
- To Bridge the knowledge gap between school and higher education through integration of ideas and learned concepts.

Agastya International Foundation has been conducting it successfully in association with Synopsis India Ltd., from past 9 years in Bangalore and Hyderabad and NCR-Delhi.

Founded in April 1999, Agastya International Foundation is a charitable education trust that runs the world's largest mobile hands-on science education program for economically disadvantaged children and teachers. By making practical, hands-on science education accessible to rural government schools, Agastya aims to transform and stimulate the thinking of underprivileged children and teachers. SHRI MADHWA VADIRAJA
INSTITUTE OF TECHNOLOGY & MANAGEMENT
Vishwothama Nagar, Udupi Dist.
BANTAKAL - 574 115

Dear Students,

At the outset, we would like to thank all the participants for their enthusiastic response, for the time and effort given to the 2nd edition of Anveshana North Karnataka zonal level. The journey from initial application and then scrutiny to this stage has been an exciting one for all of us. As you must now be aware, the overall objective of Anveshana is about mentoring young and vulnerable learners through innovative models of engineering, and broadening the horizons of the children. While selecting the projects the Screening Committee went through the project synopsis sent by various groups on the relevance of theme, how clearly the project is broadening the knowledge of the young learners through the working models and the innovation component. The projects have gone through different levels of screening, involving eliminations based on the synopsis sent, execution and learnings. 21 projects have been selected for final competition out of 95+ projects registered. It was a tough job for the Jury to select the 21 Projects. We take this opportunity to wish all the very best to all the finalists. We thank you, with an earnest request to keep up this spirit of learning and teaching. Once again congratulations for being selected for the final Competition. Now it's time for you to gear up the mentoring process. If you need any help please contact our local coordinators : Geeta Patil, +91 81528 38883; Dr Babitha, +91 99801 94450; Bhaskar SV, +91 87924 79019.

Six Projects from Students of SMVITM have been selected for Anveshana- 2021

Six Innovative Projects from students of Shri Madhwa Vadiraja Institute of Technology & Management, Bantakal have been qualified for semifinals at State level project competition, "Anveshana-2021" which is jointly organized by Government of Karnataka, Synopsys and Agastya International Foundation. It is a State level contest and the theme was United Nations Sustainable Development Goals. Anveshana is a Science and Engineering competition which will culminate in a fair where the students will exhibit their projects/models. This competition will primarily involve undergraduate Engineering students and underprivileged school going students where the students together will follow philosophies and practices of hands-on learning, research orientation, to make models based on Engineering-Science concepts. The engineering students will mentor school students in the creation of models while inducing knowledge and confidence in them. Anveshana is one platform where engineering students could collaborate with high school students to create innovative models to address real life problems.

Students of Department of EC, SMVITM have made their ideas sparkle by getting selected to semifinals from more than 300 ideas that were uploaded across different parts of Karnataka. The College had uploaded 45 new innovative ideas out of which 6 ideas have been selected to the semifinals. This has inspired with true excitement and joy in the young entrepreneurs (students).

The Management, Principal and staff members have complimented all involved in this activity for this wonderful achievement.
