eWriteRight has designed a customised online/offline course as per the VTU syllabus. As per the syllabus, we have structured the course into five modules. Each module contains submodules based on the subheadings mentioned in the syllabus. We have paid utmost attention to ensure that the content is interesting and piques the interest of the student. We have made use of cartoons, social messages, engineering-related sentences and vocabulary, visuals from movies, quizzes on remarkable facts and such like.

The course is truly revolutionary in approach and absolutely unlike a traditional paper-based textbook.

## Why eWriteRight?

Open any "technical" communication textbook. Does it really cater to the requirement of an engineering student in terms of teaching engineering vocabulary and making him/her proficient in writing scientific English.

We are rightly placed in doing so due to our unique professional experience. Our parent company-Trans Infopreneur Inc.-is a translation company. We have immense experience in translating documents in engineering, legal, general and other domains into English. Over the years, we have built up a vast repertoire of specialised vocabulary and sentences. We have made use of our rich technical communication experience to teach engineering students the basics of the same.

The only course which covers ALL the topics as per VTU syllabus in one package. Prescribed textbooks cover the syllabus partially.
