SMVITM

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

ACTIVITY SUMMARY

Student (coordinator) name: Kavya Rao

USN: 4mw18cs036

Title: Educating people about waste segregation and digital payment methods.

Activity held at: Inanje , Shirva , Manchakal , Katapadi

Objectives:

1. To separately store recyclable material for reuse and to store hazardous waste.
2. To ensure that waste which can be processed for recovery of material and energy does not become co-mixed with undesirable elements.
3. Improve the ease of conducting card/digital transactions for an individual.
4. Reduce the risks and costs of handling cash at the individual level.

Description:

The world has been moving towards all things digital for some time now. However, the year 2020 put into perspective the dire need to adapt to digital technology as soon as possible. This adaptation happened almost instantly with the lockdown coming into effect, especially digital payment in India.

Waste sorting is the process by which waste is separated into different elements. Waste sorting can occur manually at the household and collected through curbside collection schemes, or automatically separated in materials recovery facilities or mechanical biological treatment systems.

Outcomes:

1. Exhibit basic knowledge about waste management and segregation of waste disposal.
2. Provide information about advancing technology in India regarding digital payments.
3. We got information about how much people know about current waste segregation methods and technology improvement.

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Learning from this activity:

1. Improved communication skill .
2. Gathered information about what people know about waste segregation and how much inputs we could provide.
3. Got to know how people react and support students.
