Activity Title	:	To create awareness about Cyber Crimes and Cyber Security among people in Rural areas
Activity held under (Department/Cell)	:	Computer Science and Engineering
Activity held at	:	Kallianpura and Badanidiyoor
Activity Dates	:	27-10-2022 to 29-10-2022
Total Duration needed	:	80 hours

Title: Creating awareness about Cyber Crimes and Cyber Security among people in Rural areas.

Objectives of the proposal :

- To create awareness about Cyber Security and Cyber Crimes.
- To inculcate the sense of awareness among the people in Rural areas about the different types of Cyber Crimes.
- To guide the people to take the right decisions and educate them about how they can handle such situations effectively.

Background of the proposal :
To promote this plan

In addition to Internet's many benefits, it increases user's exposure to various forms of crime. Indeed, it has given rise to certain criminal offenses that were unimaginable or didn't exist in the past. Levels of privacy have decreased substantially as the Internet-using public's willingness to publish personal information has increased.

Rural people should be made aware of the threats to their identity. The people who are unaware of the circumstances find it very difficult to handle such situations and take wrong decisions. So, creating awareness about the different types of Cyber Crimes will guide them about how they can handle such situations in a right way.

People in rural areas who hesitate to use the existing technologies will confidently use them once they are aware about Cyber Security measures.

Description of the proposal :

We have come up with the initiative of conducting an awareness program in the above mentioned localities to provide information regarding the different Cyber crimes and educate the rural people about the initiatives they can take to prevent the Cyber crimes and choose effectively while handling such situations.

Milestones with time schedule & work plan:

Conduct an awareness program in the Gram Panchayats of the above mentioned localities, educate the Rural people about the prevention of cyber Crimes and guide them on effective decision-making during such situations. The group of five will be allocated with different tasks like ppt. making, pamphlet distribution, presentation during the program, etc. accordingly.

Deliverables of the project :

- Through raising the level of awareness among Rural people now, we will be moving toward the creation of an information-secure culture in the future
- Educating and guiding the people in Rural areas helps them to confidently use the Internet and other technologies.
- Video and photo proof of the program.
